**Prosser Memorial Health OB/GYN Provider Dr. Brian Sollers,
Now Offering Minimally Invasive Hysterectomy Procedure, vNotes.**

FOR IMMEDIATE RELEASE, Prosser, WA, August 8, 2022-Prosser Memorial Health introduces vNotes to its list of services, with Dr. Brian Sollers performing this new procedure. Dr. Sollers is a board-certified OB/GYN at the Prosser Memorial Women's Health Center in Prosser and is currently the only doctor in Eastern Washington performing this minimally invasive gynecological surgery.

Vaginal Natural Orifice Transluminal Endoscopic Surgery (vNotes) is an advanced procedure that combines the benefits of the laparoscopic and vaginal approaches to gynecological surgery. vNotes allows for a hysterectomy, and other procedures, to be performed vaginally with laparoscopic instruments. This method is proven to have a low rate of complications and a faster recovery time, which means less pain, less medication, and a shorter hospital stay for the patient. And with initial incisions being made vaginally, this also means the patient will not be left with any visible scarring. vNotes can be performed to treat a variety of gynecological conditions, such as ovarian cysts, fibroids, adenomyosis, and abnormal uterine bleeding.

Prosser Memorial Health is proud to offer this new innovative procedure to women in the communities we serve. For more information on the vNotes procedure and Dr. Sollers, or to schedule an appointment, please call the Prosser Women's Health Center at 509.786.0031 or visit our website www.prosserhealth.org.
